Subject: Subsurface Sediment Coring
Date: Wednesday, September 5, 2018 8:44:22 AM

Good morning,

The Cayuse is currently docked at PH-2 coordinate check station loading spuds in preparation for shallow coring today. Target sites on the agenda are as follows:

SC-S155 (4-6FT) RM 7
SC-S129 (4-6FT) RM 6.8
SC-S121 (4-6FT) RM 6.8
SC-S112 (4-6FT) RM 6.2

The Cayuse plans to core the following sites tomorrow:

SC-S019 (12-15FT) RM 7
SC-S260 (TBD)
SC-S255 (4-6FT) RM 9.8

Site S019 is flagged as an EPA split sample core and will be cored first thing Thursday morning (9/6). This target site is located near NW Natural, and they have informed PreRD that they will be sending a representative on board tomorrow to monitor the coring of S019.

Thank you,
Jonni
